Job History

Job Title	Company	Start Date	End Date	Location	Reference	Responsibilities and Achievements	Edit Job History	Remove Job History
Manufacturing Technical Lead (Technician V)	Johnson & Johnson Vision Care, Inc.	06/08/2026		Jacksonville, FL		"Lead designated-generation performance across all 3GT A-team manufacturing lines, influencing 65 technicians while aligning daily execution with safety, quality, production, throughput, yield, and OEE priorities. Coordinate line assignments and technical resources with Manufacturing Supervisors based on production priorities, technician capability, and business needs. Coach and develop 65 technicians through structured troubleshooting, hands-on mentoring, and technical skill development for safe operation, adjustment, and maintenance of automated equipment. Drive continuous OEE improvement across all supported 3GT A-team lines by analyzing production losses, performing root cause analysis, and coordinating corrective actions. Improve throughput and yield across all Flex lines through cross-functional partnership with Operations, Engineering, Quality, Maintenance, Safety, and Training. Reduce recurring downtime by applying advanced APT and software diagnostics to isolate PLC-controlled equipment, controls, servo, robotic, pneumatic, sensor, and electro-mechanical faults. Coordinate safety, quality, and production escalations and communicate operating status, risks, actions, and results in cross-functional and leadership meetings. Develop and present generation-specific technical training and support equipment installation, debug, qualification, and production start-up activities. Apply Johnson & Johnson electrical safety certification, including cabinet-entry controls, approach boundaries, and PPE requirements."

Manufacturing Technical Lead (Technician V)	Johnson & Johnson Vision Care	01/01/2026		Jacksonville FL		Lead designated-generation performance across all 3GT A-team manufacturing lines, influencing 65 technicians while aligning daily execution with safety, quality, production, throughput, yield, and OEE priorities. Coordinate shift line assignments with Manufacturing Supervisors, aligning technician capability and available resources with production priorities and business needs. Influence and develop 65 technicians through technical coaching, structured troubleshooting, and hands-on skill development for the safe operation, adjustment, and maintenance of automated production equipment. Analyze production losses and recurring equipment issues across 3GT, perform root cause analysis, and drive corrective actions that continuously improve OEE across all A-team lines. Coordinate safety, quality, and production escalations; communicate operating status, risks, actions, and results in cross-functional and leadership meetings. Partner with Operations, Engineering, Quality, Maintenance, Safety, and Training teams to improve throughput and yield across all Flex lines while strengthening equipment reliability and compliance. Develop and present technical training based on generation needs and support accurate qualification and capability development for manufacturing personnel. Reduce manufacturing downtime by applying advanced APT and software troubleshooting knowledge to diagnose PLC-controlled equipment, controls, servo, robotic, pneumatic, sensor, and electro-mechanical faults.

Engineering Technician IV	Johnson & Johnson Vision	08/08/2022	06/08/2026	Jacksonville, FL		"Delivered hardware and software enhancements for automated manufacturing equipment, improving production efficiency, product quality, and process reliability while minimizing disruption to existing operations. Applied Process Excellence, quality engineering, and structured problem-solving tools to reduce process variation, strengthen repeatability, decrease cycle-time constraints, and improve manufacturing performance. Led cross-functional improvement work from problem definition through implementation, supporting equipment upgrades, process changes, protocol execution, new product introductions, and production readiness. Converted nonconformance, CAPA, quality, and process data into corrective actions that addressed recurring failure modes and strengthened product and process reliability. Created, reviewed, and updated electro-mechanical drawings, operating procedures, maintenance and calibration procedures, and technical training manuals. Provided technical training to Operations subject-matter experts on new equipment and improvements, helping sustain correct equipment use and process changes. Maintained compliance with engineering standards, FDA, OSHA, GMP, ISO 9001, ISO 14001, equipment specifications, and environmental requirements."

Training Coordinator	JOHNSON & JOHNSON VISION CARE, INC	07/30/2018	08/08/2022	Jacksonville, FL	Maria Dees	"Directed company-wide training governance through ComplianceWire, aligning assignments, curricula, user groups, documentation, and qualification controls with manufacturing and compliance needs. Built monthly completion-trend reporting adopted into Quarterly Management Reviews, giving leaders a recurring data-based view of training performance, qualification status, and workforce readiness. Partnered with department leaders and subject-matter experts to identify skill gaps, prioritize training needs, establish new training items and quizzes, and improve curriculum coverage. Verified QUMAS and JJEDS integrations daily to ensure training links and user assignments were functioning correctly. Trained new report users and safety coordinators on ComplianceWire reporting, increasing reporting capability and compliance visibility across departments. Reviewed training status for controlled documents and coordinated curriculum placement or retirement to strengthen documentation compliance. Developed Python automation to streamline repetitive training-administration processes and improve efficiency."

Training Coordinator	Johnson & Johnson Vision Care	01/01/2018	01/01/2022	Jacksonville FL		Directed organization-wide training governance across multiple manufacturing departments, standardizing assignments, curricula, user groups, documentation, and qualification controls to strengthen compliance and workforce readiness. Converted needs assessments and stakeholder feedback into targeted learning plans, enabling department leaders and subject-matter experts to close priority capability gaps with role-relevant content. Built monthly training-completion trend reporting adopted into Quarterly Management Reviews, giving leaders a recurring, data-based view of qualification status, compliance risk, and workforce readiness. Implemented post-training evaluations and assessments that created a repeatable feedback loop for improving learning content, documentation quality, and training effectiveness. Increased reporting and compliance capability by mentoring new report users and safety coordinators, maintaining product-knowledge documentation, and serving as a qualified OSAM Lead Auditor.		
Manufacturing Technician	Vistakon	02/01/2014	07/31/2018			"Provided technical and process support for automated manufacturing lines, restoring production by diagnosing electrical components, electro-valves, sensors, servo systems, control devices, and process faults. Trained and certified Process Technicians on production equipment operation and troubleshooting, strengthening line ownership and technical capability. Investigated recurring equipment failures, identified root causes, and implemented alternative methods that reduced process variability and improved equipment repeatability and reliability. Coordinated and led improvement projects supporting yield, machine reliability, repeatability, standardization, safety, and product quality. Supported design-of-experiments activities, new products, and new installations while maintaining compliance with FDA, OSHA, GMP, ISO 9001, ISO 14001, equipment, and process requirements. Created and updated electro-mechanical drawings, operating procedures, maintenance and calibration procedures, and technical training materials."		

Job Title	Company	Start Date	End Date	Location	Reference	Responsibilities and Achievements	Edit Job History	Remove Job History
Engineering Technician	Johnson & Johnson Vision Care	01/01/2014	01/01/2018	Jacksonville FL		Restored automated production equipment by diagnosing and repairing electrical components, electro-valves, sensors, servo systems, and control devices, reducing the duration and recurrence of equipment interruptions. Accelerated technical issue resolution by coordinating Engineering, Quality, Maintenance, and Production resources around product development, manufacturing readiness, and equipment-improvement priorities. Investigated recurring equipment failures, identified root causes, and implemented alternative methods that reduced process variability and strengthened equipment repeatability. Supported design-of-experiments work that translated operating data into process adjustments improving yield, equipment reliability, repeatability, and manufacturing standardization.		
Cook	Sonny's BBQ	12/01/2013	01/01/2014			"Prepared meals and catering orders to production, quality, sanitation, and timing requirements. Organized workstations, monitored inventory, restocked supplies, and completed closing activities to support efficient shift transitions. Collaborated with team members to maintain service flow during daily operations."		
Workcenter Supervisor	US NAVY	06/01/2013	10/01/2013			"Directed 8 operators in the safe operation and maintenance of a submarine nuclear propulsion plant, sustaining mission readiness in a zero-failure environment governed by stringent procedural and regulatory controls. Oversaw maintenance quality and troubleshooting for more than \$15 million in nuclear reactor plant equipment. Planned and scheduled Reactor Control preventive and corrective maintenance, coordinating personnel, equipment, work packages, priorities, and execution. Implemented technical training for an 8-person work center and ensured junior personnel demonstrated prerequisite knowledge before qualifying to stand watch. Qualified and led 7 reactor-control personnel through complex plant evolutions, strengthening team readiness, procedural compliance, and safe response under high-consequence conditions."		

Job Title	Company	Start Date	End Date	Location	Reference	Responsibilities and Achievements	Edit Job History	Remove Job History
Reactor Maintenance Supervisor / Work Center Supervisor	UNITED STATES NAVY	01/01/2010	01/01/2013			Directed 8 operators in the safe operation and maintenance of a submarine nuclear propulsion plant, sustaining mission readiness in a zero-failure environment governed by stringent procedural and regulatory controls. Coordinated personnel, equipment, work packages, and priorities for propulsion-plant upkeep and reactor-control preventive maintenance, improving execution discipline and equipment availability. Qualified and led 7 reactor-control personnel through complex plant evolutions, strengthening team readiness, procedural compliance, and safe response under high-consequence operating conditions. Generated more than \$100K in documented savings by diagnosing and repairing advanced electronic assemblies at component level rather than relying on higher-cost replacement. Protected operational readiness of more than \$15M in nuclear reactor equipment through complex testing, calibration, certification, preventive maintenance, and component-level repair. Designed and delivered qualification programs for 25+ new hires within two years, expanding the pipeline of trained personnel available for mission-critical operations. Maintained accountability for more than \$30M in electronic inventory, reducing damage exposure and avoidable repair costs through preventive maintenance and disciplined asset controls.

My long-term goal is to progress through Manufacturing Leadership within Johnson & Johnson. Over the next several years I am working toward a Manufacturing Supervisor opportunity where I can expand my impact through people leadership, workforce development, operational excellence, and cross-functional collaboration. Longer term, I aspire to Manufacturing Manager and Operations Leadership roles, leveraging my background in manufacturing operations, automation, process improvement, technician development, and data-driven decision making.

Performance

Goals

- Individual Goals
- Saved for Later Goals

Completed

Credo

By year-end, actively demonstrate the Credo through actions including, but not limited to:

1. Participating in Global Learn Week, and
2. Making progress toward one documented development goal, as confirmed by supervisor review.

CategoryLeadership Commitments (the“How”)

Completed

Increase OEE on the line I operate by 4–6 percentage points by addressing availability (downtime), performance (speed losses), and quality (first-pass yield).

CategoryBusiness/People Goals (the“What”)

Completed

Job Responsibilities

Throughout the performance year:

1. Consistently perform all core responsibilities outlined in the job description throughout the performance year.

- 2. Meet safety, quality, productivity, and compliance expectations for the role.
- 3. Maintain required certifications, training, and qualifications.
- 4. Demonstrate reliable attendance, punctuality, and professional workplace conduct.
- 5. Ensure performance meets expectations as confirmed through supervisor feedback and applicable performance metrics.

Category Business/People Goals (the“What”)

Completed

Lead with a C.E.O. mindset — Compete, Execute, Optimize — to elevate performance and deliver impact for patients, customers, and teams. Be the C.E.O. of your own work: take ownership, make decisions, and act with accountability.

Compete: Strive to win with integrity. Focus on what matters most, set stretch goals, and prioritize the levers that drive real business impact, always with responsibility and compliance. Bring the voice of the customer and patient into everything you do.

Execute: Deliver with discipline. Align goals and be clear on ownership, act with urgency, and use transparent scorecards to track progress. Focus on solving problems, not storytelling.

Optimize: Improve how we work. Prioritize and simplify where it makes sense, learn continuously. Give honest, ongoing and direct feedback — be J&J Direct.

Guided by Our Credo and Purpose, lead inclusively to cultivate a workplace where every employee feels a profound sense of belonging and is empowered to thrive

Category Leadership Commitments (the“How”)

Completed

Lean

- 1. Problem-Solving: By the end of the performance year, actively participate in at least one structured problem-solving activity (A3, RCPS, or kaizen).
- 2. Standard Work Observations: By year-end, complete at least two standard work observations, documenting findings and improvement opportunities.
- 3. Good Saves: By year-end, submit or be involved in at least two documented Good Saves that help prevent safety, quality, or operational issues.
- 4. Quality: By year-end, actively participate in minimizing human error nonconformances and adhere to all Quality procedures.

Category Business/People Goals (the“What”)

Completed

LEAN ADD-ON GOAL: TO BE ADDED BY EMPLOYEE

Category Business/People Goals (the“What”)

Completed

Lean Operational Excellence Goals
Lead a TDM / Tier Meeting Topic: Lead or co-lead one Tier meeting topic (e.g., safety, quality, or improvement updates) by year-end.
Gemba Participation: Participate in at least one Gemba walk or improvement workshop, contributing observations or feedback.

Category Leadership Commitments (the“How”)

Completed

Maintain all required safety/first-responder certifications

Category Business/People Goals (the“What”)

Completed

Reduce unplanned downtime on my assigned line by 20% through focused RCA on top 5 failure modes, improved spare-parts kits, and tighter PM adherence.

Category Business/People Goals (the“What”)

Archived Goals

Archived

Safety•Complete a min of 2 Good Saves•Adhere to and enforce distracted walking policyQuality•Ensure CMMS entries are timely, accurate, and tied to Heat Map•100% on time closure of PM tasks•Assist in reducing human error QEs on C TeamPeople and Culture•95% on time completion with Site Policies and Compliance wire/Summit•Develop personal goals and developmental plan

Category Business/People Goals (the“What”)

Archived

Safety•Deliver green metrics for PM scorecard, PM recovery, and health check•Meet LPS (ramp plan) and volume targets (CFPM)•Assist in training/ development of newer technicians•Assist in controlling unnecessary operations costs•Assist in training / development of newer techniciansLean•Assist with continuous improvement for 5S sustainability and Gemba/pulse walks

Job History

Job History

Manufacturing Technical Lead (Technician V)
"Lead designated-generation performance across all 3GT A-team manufacturing lines, influencing 65 technicians while aligning daily execution with safety, quality, production, throughput, yield, and OEE priorities.

Coordinate line assignments and technical resources with Manufacturing Supervisors based on production priorities, technician capability, and business needs.

Coach and develop 65 technicians through structured troubleshooting, hands-on mentoring, and technical skill development for safe operation, adjustment, and maintenance of automated equipment.

Drive continuous OEE improvement across all supported 3GT A-team lines by analyzing production losses, performing root cause analysis, and coordinating corrective actions.

Improve throughput and yield across all Flex lines through cross-functional partnership with Operations, Engineering, Quality, Maintenance, Safety, and Training.

Reduce recurring downtime by applying advanced APT and software diagnostics to isolate PLC-controlled equipment, controls, servo, robotic, pneumatic, sensor, and electro-mechanical faults.

Coordinate safety, quality, and production escalations and communicate operating status, risks, actions, and results in cross-functional and leadership meetings.

Develop and present generation-specific technical training and support equipment installation, debug, qualification, and production start-up activities.

Apply Johnson & Johnson electrical safety certification, including cabinet-entry controls, approach boundaries, and PPE requirements."

Johnson & Johnson Vision Care, Inc.

June 2026 - Present | 3 months | Jacksonville, FL

Manufacturing Technical Lead (Technician V)

Lead designated-generation performance across all 3GT A-team manufacturing lines, influencing 65 technicians while aligning daily execution with safety, quality, production, throughput, yield, and OEE priorities.

Coordinate shift line assignments with Manufacturing Supervisors, aligning technician capability and available resources with production priorities and business needs.

Influence and develop 65 technicians through technical coaching, structured troubleshooting, and hands-on skill development for the safe operation, adjustment, and maintenance of automated production equipment.

Analyze production losses and recurring equipment issues across 3GT, perform root cause analysis, and drive corrective actions that continuously improve OEE across all A-team lines.

Coordinate safety, quality, and production escalations; communicate operating status, risks, actions, and results in cross-functional and leadership meetings.

Partner with Operations, Engineering, Quality, Maintenance, Safety, and Training teams to improve throughput and yield across all Flex lines while strengthening equipment reliability and compliance.

Develop and present technical training based on generation needs and support accurate qualification and capability development for manufacturing personnel.

Reduce manufacturing downtime by applying advanced APT and software troubleshooting knowledge to diagnose PLC-controlled equipment, controls, servo, robotic, pneumatic, sensor, and electro-mechanical faults.

Johnson & Johnson Vision Care

January 2026 - Present | 8 months | Jacksonville FL

Engineering Technician IV

"Delivered hardware and software enhancements for automated manufacturing equipment, improving production efficiency, product quality, and process reliability while minimizing disruption to existing operations.

Applied Process Excellence, quality engineering, and structured problem-solving tools to reduce process variation, strengthen repeatability, decrease cycle-time constraints, and improve manufacturing performance.

Led cross-functional improvement work from problem definition through implementation, supporting equipment upgrades, process changes, protocol execution, new product introductions, and production readiness.

Converted nonconformance, CAPA, quality, and process data into corrective actions that addressed recurring failure modes and strengthened product and process reliability.

Created, reviewed, and updated electro-mechanical drawings, operating procedures, maintenance and calibration procedures, and technical training manuals.

Provided technical training to Operations subject-matter experts on new equipment and improvements, helping sustain correct equipment use and process changes.

Maintained compliance with engineering standards, FDA, OSHA, GMP, ISO 9001, ISO 14001, equipment specifications, and environmental requirements."

Johnson & Johnson Vision

August 2022 - June 2026 | 3 years 10 months | Jacksonville, FL

Process Engineering Technician

Delivered hardware and software enhancements for automated manufacturing equipment, helping improve production efficiency, product quality, and process reliability while minimizing disruption to existing operations.

Applied quality engineering and structured problem-solving tools to reduce process variation, strengthen repeatability, and improve manufacturing performance within engineering, ISO, and GMP requirements.

Led cross-functional manufacturing improvement work from problem definition through implementation, supporting equipment upgrades, process changes, new product introductions, and production

readiness.

Converted nonconformance, CAPA, quality, and process data into corrective actions that addressed recurring failure modes and improved product and process reliability.

Expanded operator capability by translating equipment changes and technical requirements into practical training that supported correct equipment use and sustained process improvements.

Johnson & Johnson Vision Care

January 2022 - January 2026 | 4 years | Jacksonville FL

Training Coordinator

"Directed company-wide training governance through ComplianceWire, aligning assignments, curricula, user groups, documentation, and qualification controls with manufacturing and compliance needs.

Built monthly completion-trend reporting adopted into Quarterly Management Reviews, giving leaders a recurring data-based view of training performance, qualification status, and workforce readiness.

Partnered with department leaders and subject-matter experts to identify skill gaps, prioritize training needs, establish new training items and quizzes, and improve curriculum coverage.

Verified QUMAS and JJEDS integrations daily to ensure training links and user assignments were functioning correctly.

Trained new report users and safety coordinators on ComplianceWire reporting, increasing reporting capability and compliance visibility across departments.

Reviewed training status for controlled documents and coordinated curriculum placement or retirement to strengthen documentation compliance.

Developed Python automation to streamline repetitive training-administration processes and improve efficiency."

JOHNSON & JOHNSON VISION CARE, INC

July 2018 - August 2022 | 4 years | Jacksonville, FL

Training Coordinator

Directed organization-wide training governance across multiple manufacturing departments, standardizing assignments, curricula, user groups, documentation, and qualification controls to strengthen compliance and workforce readiness.

Converted needs assessments and stakeholder feedback into targeted learning plans, enabling department leaders and subject-matter experts to close priority capability gaps with role-relevant content.

Built monthly training-completion trend reporting adopted into Quarterly Management Reviews, giving leaders a recurring, data-based view of qualification status, compliance risk, and workforce readiness.

Implemented post-training evaluations and assessments that created a repeatable feedback loop for improving learning content, documentation quality, and training effectiveness.

Increased reporting and compliance capability by mentoring new report users and safety coordinators, maintaining product-knowledge documentation, and serving as a qualified OSAM Lead Auditor.

Johnson & Johnson Vision Care

January 2018 - January 2022 | 4 years | Jacksonville FL

Manufacturing Technician

"Provided technical and process support for automated manufacturing lines, restoring production by diagnosing electrical components, electro-valves, sensors, servo systems, control devices, and process faults.

Trained and certified Process Technicians on production equipment operation and troubleshooting, strengthening line ownership and technical capability.

Investigated recurring equipment failures, identified root causes, and implemented alternative methods that reduced process variability and improved equipment repeatability and reliability.

Coordinated and led improvement projects supporting yield, machine reliability, repeatability, standardization, safety, and product quality.

Supported design-of-experiments activities, new products, and new installations while maintaining compliance with FDA, OSHA, GMP, ISO 9001, ISO 14001, equipment, and process requirements.

Created and updated electro-mechanical drawings, operating procedures, maintenance and calibration procedures, and technical training materials."

Vistakon

February 2014 - July 2018 | 4 years 5 months

Engineering Technician

Restored automated production equipment by diagnosing and repairing electrical components, electro-valves, sensors, servo systems, and control devices, reducing the duration and recurrence of equipment interruptions.

Accelerated technical issue resolution by coordinating Engineering, Quality, Maintenance, and Production resources around product development, manufacturing readiness, and equipment-improvement priorities.

Investigated recurring equipment failures, identified root causes, and implemented alternative methods that reduced process variability and strengthened equipment repeatability.

Supported design-of-experiments work that translated operating data into process adjustments improving yield, equipment reliability, repeatability, and manufacturing standardization.

Johnson & Johnson Vision Care

January 2014 - January 2018 | 4 years | Jacksonville FL

Cook

"Prepared meals and catering orders to production, quality, sanitation, and timing requirements.

Organized workstations, monitored inventory, restocked supplies, and completed closing activities to support efficient shift transitions.

Collaborated with team members to maintain service flow during daily operations."

Sonny's BBQ

December 2013 - January 2014 | 1 month

Workcenter Supervisor

"Directed 8 operators in the safe operation and maintenance of a submarine nuclear propulsion plant, sustaining mission readiness in a zero-failure environment governed by stringent procedural and regulatory controls.

Oversaw maintenance quality and troubleshooting for more than \$15 million in nuclear reactor plant equipment.

Planned and scheduled Reactor Control preventive and corrective maintenance, coordinating personnel, equipment, work packages, priorities, and execution.

Implemented technical training for an 8-person work center and ensured junior personnel demonstrated prerequisite knowledge before qualifying to stand watch.

Qualified and led 7 reactor-control personnel through complex plant evolutions, strengthening team readiness, procedural compliance, and safe response under high-consequence conditions."

US NAVY

June 2013 - October 2013 | 4 months

Reactor Maintenance Supervisor / Work Center Supervisor

Directed 8 operators in the safe operation and maintenance of a submarine nuclear propulsion plant, sustaining mission readiness in a zero-failure environment governed by stringent procedural and regulatory controls.

Coordinated personnel, equipment, work packages, and priorities for propulsion-plant upkeep and reactor-control preventive maintenance, improving execution discipline and equipment availability.

Qualified and led 7 reactor-control personnel through complex plant evolutions, strengthening team readiness, procedural compliance, and safe response under high-consequence operating conditions.

Generated more than \$100K in documented savings by diagnosing and repairing advanced electronic assemblies at component level rather than relying on higher-cost replacement.

Protected operational readiness of more than \$15M in nuclear reactor equipment through complex testing, calibration, certification, preventive maintenance, and component-level repair.

Designed and delivered qualification programs for 25+ new hires within two years, expanding the pipeline of trained personnel available for mission-critical operations.

Maintained accountability for more than \$30M in electronic inventory, reducing damage exposure and avoidable repair costs through preventive maintenance and disciplined asset controls.

UNITED STATES NAVY

January 2010 - January 2013 | 3 years

Electronic Technician

"Operated and maintained submarine nuclear propulsion and Reactor Control systems under stringent technical, safety, quality, and procedural requirements.

Generated more than \$100,000 in documented savings by diagnosing and repairing advanced electronic assemblies at component level instead of relying on higher-cost replacement.

Protected operational readiness of more than \$15 million in nuclear reactor equipment through testing, calibration, certification, preventive maintenance, and component-level repair.

Maintained accountability for more than \$30 million in electronic inventory, reducing damage exposure and avoidable repair costs through disciplined controls and preventive maintenance.

Designed and delivered technical qualification programs for 25+ personnel within two years, expanding the pool of trained staff available for mission-critical operations.

Qualified as Load Dispatcher and Operator of Shutdown Reactor Plant; received the Commanding Officer's Personal Excellence Award and was promoted by the Captain for technical knowledge and leadership."

US NAVY

February 2008 - October 2013 | 5 years 8 months

Nuclear Electronic Technician

"Operated and maintained submarine nuclear propulsion and Reactor Control systems under stringent technical, safety, quality, and procedural requirements.

Generated more than \$100,000 in documented savings by diagnosing and repairing advanced electronic assemblies at component level instead of relying on higher-cost replacement.

Protected operational readiness of more than \$15 million in nuclear reactor equipment through testing, calibration, certification, preventive maintenance, and component-level repair.

Maintained accountability for more than \$30 million in electronic inventory, reducing damage exposure and avoidable repair costs through disciplined controls and preventive maintenance.

Designed and delivered technical qualification programs for 25+ personnel within two years, expanding the pool of trained staff available for mission-critical operations.

Qualified as Load Dispatcher and Operator of Shutdown Reactor Plant; received the Commanding Officer's Personal Excellence Award and was promoted by the Captain for technical knowledge and leadership."

US NAVY

February 2008 - October 2013 | 5 years 8 months

Reactor Operator and Technician Qualified Reactor Maintenance Technician

"Directed 8 operators in the safe operation and maintenance of a submarine nuclear propulsion plant, sustaining mission readiness in a zero-failure environment governed by stringent procedural and regulatory controls.

Oversaw maintenance quality and troubleshooting for more than \$15 million in nuclear reactor plant equipment.

Planned and scheduled Reactor Control preventive and corrective maintenance, coordinating personnel, equipment, work packages, priorities, and execution.

Implemented technical training for an 8-person work center and ensured junior personnel demonstrated prerequisite knowledge before qualifying to stand watch.

Qualified and led 7 reactor-control personnel through complex plant evolutions, strengthening team readiness, procedural compliance, and safe response under high-consequence conditions."

US NAVY

February 2008 - October 2013 | 5 years 8 months

Founder and CEO
"Established operating strategy, organizational structure, mission, and performance expectations for a small business.

Created and administered an annual budget with controls supporting cost discipline and sustainability.

Reviewed functional performance and partnered with leadership to improve processes, procedures, accountability, and regulatory compliance.

Conducted market and competitive research to identify trends, pricing opportunities, and business priorities.

Developed performance reporting using Google Analytics to support resource allocation and client metrics.

Participated in senior hiring decisions, leadership interviews, and organizational planning."

Imbobness LLC.
January 2008 - Present | 18 years 8 months | Jacksonville, FL

Package handler
"Supported high-volume package flow by safely unloading, sorting, and routing shipments according to labels, load plans, ZIP codes, and destination requirements.

Handled packages up to 70 pounds while maintaining quality, pace, safety, and customer-service expectations.

Coordinated with team members to maintain conveyor flow and support accurate scanning and shipment movement."

UPS
February 2006 - July 2014 | 8 years 5 months

Employee ID	1039274
Supervisory Organization	JOHNSON AND JOHNSON (JOAQUIN DUATO (22500016)) >> Manufacturing Engineering (Kevin Limbrick (152198154))
Position	Manufacturing Technical Lead
Business Title	Manufacturing Technical Lead
Job Profile	Expert Operator, Manufacturing Assembly (S5)
Employee Type	Regular
Management Level	6 Professional/Technical
Time Type	Full time
FTE	100.00%
Location	US076 FL Jacksonville - 7500 Centurion Pkwy
Hire Date	09/29/2014
Original Hire Date	09/29/2014
Continuous Service Date	09/29/2014
Years of Service	11.98

Time in Position 0.28 year(s)
